Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 125-148, drawn to compounds and compositions, classified in class 564, subclass: various.
- II. Claims 149-150, drawn to methods of use of the above compounds and compositions, classified in class 514, subclass: various.
- III. Claims 151-161, drawn to methods of synthesis of the above compounds, classified in class 564, subclass: various.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and II are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. **The product claim (Group I: claims 1-11, 125-146 and 148) will be examined along with the elected invention (either Group II or Group III) (MPEP § 806.05(i)).**

Claims 1-11 and 125-161 are generic to a plurality of disclosed patentably distinct species comprising the compounds described by formula I. Applicant is also required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. The examiner respectfully requests that the elected species be explicitly defined in terms of the variables of formula I.

Art Unit: 1621

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
